EXAMPLE OF NO GRIDS & LINES USAGE

Mock Posters

- * Any composition can be broken into a modular grid with uneven & asymmetrical modules. Each of these modules can be filled with copy/image/key visual elements.
- * This method creates customizable complex grid systems, which allows for a lot of information to present.

- * Reference page 5.
- * Large masked film icons can be a stand-alone focal point for simpler photographic compositions.
- * Can be utilized for social media platform posts.

- * Grid lines should be black/white, thin stroke (1-3pt based on composition proportions).

05 Additional Elements

3D FILM ELEMENTS

- * Different angles of 3D film elements can be used to juxtapose the flatness of the composition.
- * These elements can be downloaded in the Google Drive folder *VFF 2023 > Assets > Additional Elements > 3D*.

HALFTONE TEXTURES

- * Avoid overusing.
- * Can be applied onto images to add a level of complication to them and break up the clean look of the gradients.
